# THE SCHOOL AND ITS FACILITIES

**Organization** In the spring of 1914 the Board of Directors of Loyola University invited Dr. C. V. Vignes to begin the organization of a faculty for a School of Dentistry. Dr. Vignes became the first dean of the new school which enrolled its first students in September, 1914. The School of Dentistry is an integral part of the University, organized under its general Charter and governed by its Board of Directors.

**Rating of the University** Loyola University is accredited by the Southern Association of Colleges and Secondary Schools and the National Catholic Educational Association, and holds membership in the Jesuit Educational Association the Association of American Colleges, American Association of Colleges for Teacher Education, and is accredited by National Council for Accreditation of Teacher Education.

The School of Dentistry is on the list of approved dental schools of the Council on Dental Education of the American Dental Association. It is a member of the American Association of Dental Schools, and complies with the recommendations of this Association.

**Objectives** At all times and in all activities the School seeks to maintain the highest possible standards.

The educational program directs and assists the student in fitting himself for the general practice of his profession in all the biological, technical and social aspects of oral health service, and encourages him in developing habits of study and inquiry. Solid content in courses, strict standards of scholarship, and sound methods of teaching guide the student in his acquisition of initiative and self-reliance in extending his knowledge and developing his skill.

**Location** The University is situated in one of the best residential sections of New Orleans, at 6363 St. Charles Avenue, opposite Audubon Park. The School of Dentistry, occupying Bobet Hall, is located on the campus.

**Student Housing** The University maintains a limited number of rooming houses for the convenience of students wishing to use these facilities. Names and locations of inspected and approved rooming houses will be furnished by the Dean of Students.

**Equipment** The School is well equipped. Particular care has been taken to make the laboratories and clinics adequate and modern. The technical laboratories are large, bright and airy. Each student has an individual laboratory desk with gas, compressed air, and electrical connections. Furnaces, dental engines, polishing motors, casting machines and electrical ovens are available. All other laboratories are well planned and equipped.

The Dental School Clinics, well lighted and ventilated, are equipped throughout with standard operative units and chairs and sterilizers. The number of patients and variety of work amply insure each student sufficient experience to make him proficient in clinical work before graduation.

**Hospital Facilities** Exceptional facilities for acquiring actual experience in hospital practice and methods are available and are utilized by the students of dentistry.

In the Louisiana State Charity Hospital, students observe hospital practice in diagnosis, ward rounds, anesthesia, and surgery. The morning outpatient dental surgery clinic is staffed by students under the supervision of their teachers.

Members of the senior and junior classes attend clinics in surgery at the Louisiana State Charity Hospital under some of the foremost surgeons in the South. They are instructed in making diagnoses and witness the subsequent operations. They observe the administration of various forms of anesthetics and learn the importance of aseptic precautions.

**Library** The Library of the Dental School is an integral part of the large University Library, situated adjacent to the Dental School and easily accessible to the students.

**Student Loans** The University in conjunction with a local bank provides a loan service for students to defray the costs of tuition and fees.

In addition the following loans are available to dental students:

The Woman's Auxiliary of the Louisiana Dental Association Loan Fund available to senior and junior students of the State of Louisiana.

The American Dental Trade Association Loan Fund and the Higgins Loan Fund available to senior students only.

The Kellogg Loan Fund.

Loyola shares in the National Defense Student Loan Program whereby the student can borrow as much as $1,000 a year towards his education without paying any interest until one year after graduation.

All applications for Student Loans must be submitted to the School of Dentistry at least one month before registration day of the semester for which the loan is requested.

**University Chaplain** The University appoints a Priest, together with needed assistants, to the post of University Chaplain for all of the students. He is at their disposition at all times to guide, counsel and advise. The students will find him ready to assist them in their spiritual, personal and individual problems. He is also, in general, responsible for all of the organized spiritual activities on the campus.

**Student Council** This Council consists of twenty-seven members, representing the College of Arts and Sciences, the Schools of Dentistry and Law, and the Colleges of Pharmacy, Music, and Business Administration. These students are selected by the student body with the approval of the faculty. The duty of the Council is to unify student thought and action. It conducts general meetings and elections, sponsors and manages interclass contests, contributes to the student publications, and leads and directs student activities.

**Medical Service** Loyola University maintains a medical service on the campus. This service insures a safe health program for both students and faculty.

**Organizations** Students in the School of Dentistry are eligible to membership in various scholastic, religious, cultural, and athletic organizations of the University including the several dental societies and fraternities.

**The C. Victor Vignes Odontological Society** This is an undergraduate honor society open to Seniors, Juniors and Sophomores and named for the late Dean Emeritus C. V. Vignes, the first dean of the School, distinguished for his service to organized dentistry and dental education. Scholarship above the average and ambition to excel are required for membership, to which a student is elected by the members of the Society with the approval of the Dean. Its purpose is "to

further the interest and knowledge of its members in the science of dentistry." Scientific papers, table clinics and demonstrations by the members of the Society, by the Faculty, Alumni, and other guests form the programs of the meetings.

**Junior A.D.A.** To stimulate the students to appreciate and to participate in the activities of organized dentistry, and to fit them in some degree to do so, the entire student body is required to hold Junior membership in the American Dental Association and to take active part in its work.

**Dental Fraternities** Further to inspire the student with high professional ideals both during his school days and in after life, chapters of the various national dental fraternities are maintained. There is the Delta Omega Chapter of the Psi Omega; the Alpha Chi Chapter of Xi Psi Phi; the Zeta Zeta Chapter of Delta Sigma Delta.

**Omicron Kappa Upsilon** This is a national honor fraternity for graduates. Seniors are elected to it by the faculty members of the Society. Not more than twelve per cent of a graduating class may be elected, and then only on a basis of superior scholarship, character, and conduct.

**The Alumni Association** This organization, having for its purpose to keep alive within its members the spirit of study and to assist the School, holds meetings periodically, one of which is the annual reunion.

# ADMISSION AND REGISTRATION

**The Pre-Dental Course** The minimum basis for admission to the School of Dentistry is the successful completion of two full academic years of work in an accredited college of liberal arts and sciences. The pre-dental course must include at least a year's credit in English, in biology, in physics, in inorganic chemistry, and in organic chemistry. All courses in science should include both class and laboratory instruction and must carry at least eight semester hours of credit.

The pre-dental course is offered at Loyola in the College of Arts and Sciences.

No applicant will be considered for admission to the Loyola University School of Dentistry unless the official record of all his pre-dental college work indicates a general average of C or better.

All applicants are required to take an aptitude test given under the jurisdiction of the Council on Dental Education of the American Dental Association.

**Combined B.S. and D.D.S. Degrees** Owing to the amount of college preparation required for admission to the dental course, it now becomes feasible for the candidate for a D.D.S. degree to receive also a B.S. degree without much additional time being spent in the College of Arts and Sciences.

Accordingly, it is strongly recommended that students preparing to enter the School of Dentistry discuss this matter with their Deans, and ascertain the precise requirements in their colleges. In many instances it will be found that by attending summer courses, in addition to the pre-dental course of two years, they will be eligible to receive a B.S. degree prior to their receiving the D.D.S. degree. In the case of those students who have made three years of the course leading to the B.S. degree, there should ordinarily be no difficulty about receiving this degree during their dental course.

**Application for Admission** Applicants for admission to the School of Dentistry are advised to make their applications early and in writing, preferably on completion of the

first semester of pre-dental work. Application forms for this purpose may be secured from the Office of the Registrar, Loyola University School of Dentistry, and the completed form accompanied by a photograph and $10.00 to cover the evaluation fee should be returned to the same address. Applicants must request the Registrar of each college or university which they have attended to send directly to the Registrar of Loyola University School of Dentistry an official transcript of all of their college work. Interviews of the applicants by the Committee on Admission are required.

The decision as to whether an applicant possesses the qualifications required in a student of Loyola University School of Dentistry rests entirely with the Committee on Admission.

The Dental School is open to women who have the proper credentials.

**Registration** First semester registration will take place on the Tuesday, Wednesday and Friday preceding the date of opening of classes. Freshman students will register on the Wednesday of the registration week. Second semester registration will take place on the first Monday of the second semester. The procedure is:

1. Fill out the registration cards which are obtained in the Registrar's office in the School of Dentistry (Room 206, Bobet Hall).

2. Report to the Finance office (Marquette Hall), with one copy of the registration card and pay tuition and fees.

Students must complete their registration and obtain the required equipment and books prior to the opening of classes.

**Basis of Computation** A student's expenses in the school of dentistry may be classed under the following headings: Fees, Books, Instruments and Supplies.

**Fees** The basic fee payable to the University on registration each semester includes registration, tuition, laboratory, library, subscription to the Maroon and the Wolf, athletics, lecture forum, physical education, and certain other student activities. The basic fee is $400.00 each semester for all Louisiana students and $525.00 each semester for all out-of-state students.

**Monthly Payments** Students are expected to pay the full tuition for one semester on the day of registration of each semester unless they are following the Tuition Plan described below.

*All arrangements for payment must be made before the completion of registration with the Treasurer of the University.*

We are glad to offer the convenient Tuition Plan for those parents who prefer to pay tuition and other fees in equal monthly installments. The following plans are available at the cost indicated:

| | | |
|---|---|---|
| One Year Plan | ( 8 payments) | 4% more than Cash Price |
| Two Year Plan | (20 payments) | 5% more than Cash Price |
| Three Year Plan | (30 payments) | 6% more than Cash Price |
| Four Year Plan | (40 payments) | 6% more than Cash Price |

The two, three and four year plans include Parent Life Insurance for qualified parents. This insurance coverage provides funds for the cost of the remaining period of schooling covered by the contract, if the parent who has signed the contract dies. A descriptive pamphlet will be sent upon request from the Director of Admissions.

The Tuition Plan is optional and offered solely as a convenience.

*The breakage deposit* of $10.00 is required of each student from which charges for loss or breakage are to be deducted and the balance refunded to the student upon presentation of the breakage card.

*A late registration fee* of $5.00 is required of each student who fails to register during the regular registration period.

*A cap and gown deposit* of $30.00 is required of each candidate for graduation. This deposit must be made not later than May 1st. The full deposit will be refunded provided the cap and gown are returned in good condition immediately after graduation. If they are returned more than two months after graduation only $10.00 will be refunded.

*Refunds upon withdrawal.* It is the sole duty of the individual student, in case of interruption of courses, to make

formal application to the Registrar's office for refunds which will be made as follows:

Within the first week of a semester.....80 per cent

One week to three weeks of a semester.....60 per cent

Three weeks to five weeks of a semester.....40 per cent

No refunds after five weeks.

The $100.00 paid upon acceptance is not refundable.

No refunds are made when a student is suspended, dismissed for disciplinary reasons, or fails to pass.

**Books** The list of required books will be furnished on registration. These books must be purchased new by the student at the University Bookstore.

**Instruments and Supplies** Detailed instrument and supply lists will be furnished on request. All such equipment must be new and must be in the student's possession by the time classes open for the school year.

**Summary of Expenses** The following table shows the approximate costs of each semester of the dental course.

FRESHMAN YEAR, 1962-1963

| Tuition and Fees: | 1st Sem. | 2nd Sem. |
|---|---|---|
| Louisiana Students | $400.00 | $400.00 |
| Out-of-State Students | 525.00 | 525.00 |
| Books (approximately) | 90.00 | 20.00 |
| Instruments and Supplies (approximately) | 525.00 | ..... |
| (Plus additional expendable supplies as needed) | | |

SOPHOMORE YEAR, 1962-1963

| Tuition and Fees: | | |
|---|---|---|
| Louisiana Students | $400.00 | $400.00 |
| Out-of-State Students | 525.00 | 525.00 |
| Books (approximately) | 95.00 | 15.00 |
| Instruments and Supplies (approximately) | 840.00 | ..... |
| (Plus additional expendable supplies as needed) | | |

Junior Year, 1962-1963

| | | |
|---|---|---|
| Tuition and Fees: | | |
| Louisiana Students | $400.00 | $400.00 |
| Out-of-State Students | 525.00 | 525.00 |
| Books (approximately) | 50.00 | ..... |
| Instruments and Supplies (approximately) | 510.00 | ..... |
| (Plus additional expendable supplies as needed) | | |

Senior Year, 1962-1963

| | | |
|---|---|---|
| Tuition and Fees: | | |
| Louisiana Students | $400.00 | $400.00 |
| Out-of-State Students | 525.00 | 525.00 |
| Books (approximately) | 30.00 | ..... |
| Supplies (approximately) | 60.00 | ..... |
| (Plus additional expendable supplies as needed) | | |

# PROMOTION AND GRADUATION

**Attendance** Regular and punctual attendance at all classes and laboratory exercises is required. Unexcused absences will be deemed sufficient reason for dismissal, or for the withholding of credits for the year's work.

To be eligible for examination in a subject a student is required to have a minimum attendance record of 85 per cent in that subject.

If absences caused by personal illness reduce a student's attendance record to not less than 75 per cent, a student may be permitted, with the approval of the instructor of the course and the Dean, to do a sufficient amount of make-up work to meet the required minimum.

A double absence will be recorded for each absence on the two days immediately preceding and the two days immediately following a scheduled vacation.

All classes will meet at the time shown on the schedule. A student may not be admitted after instruction has begun.

The attendance record will be made at the beginning of all scheduled periods and at any intervals thereafter at the discretion of the class instructor.

Tardiness of more than ten minutes will be counted as an absence. Two tardy marks are counted as one absence.

**Examinations and Grades** Each instructor who is in charge of a course will prepare and conduct written or oral examinations frequently throughout each semester of a course. The nature and extent of this work must afford a sound basis for evaluating the student's achievement throughout the course. It is the responsibility of the course instructor to properly inform students of the progress during the semester.

A student's scholarship grades will be reported by the course instructor to the office of the Dean at mid-semester and at end of semester.

Official semester grades are expressed in letters. A corresponds to a grade of 93 to 100 in a 100-point scale, B to a grade of 85 to 92, C to a grade of 77 to 84, D to a grade of 70 to 76, E to a grade of 63 to 69, F to a grade of 0 to 62. The lowest passing mark is D.

The mark I (incomplete) may be used for those instances in which an otherwise satisfactory student has been unable to complete some portion of his required work because of unexpected and excusable circumstances. This mark may be given only when the amount of uncompleted work is relatively small and can be completed within a reasonable period of time. The mark E (condition) requires a student to pass a new examination or show a certain degree of proficiency in a specified study as a condition of remaining in the class or institution. Both the mark E and I automatically become F (failed) if the student does not remove the deficiencies indicated by these grades.

No grade higher than D will be given for any examination taken out of the regular time for any reason. For every such examination, there is a charge of $2.00, payable to the Registrar of the School of Dentistry.

**Promotion** A candidate for promotion must present not only the required character and quantity of work but he must attain at least a certain minimum quality in his work.

A student will not be promoted while any failure or any condition, or any incomplete course is charged against him.

If a student receives three conditions at the end of the first semester he must withdraw from the School. However, in unusual cases at the discretion of the Admissions Committee upon recommendation of the Executive Faculty, a student may be allowed to continue in the second semester if the Executive Faculty thinks he has a chance of overcoming his deficiencies.

If a student receives three conditions at the end of the year he must withdraw but may be allowed to repeat the year at the discretion of the Admissions Committee upon the recommendation of the Executive Faculty.

If a student receives a failure in any course at the end of any semester he must withdraw from the School but he may be allowed to repeat the year at the discretion of the Admissions Committee upon the recommendation of the Executive Faculty.

If permitted by special action of the Committee on Admission to repeat a year, the student must repeat all the subjects

of that year and maintain an average quality point ratio of at least 2.00. If in a repetition he fails to attain that average he must withdraw from the School and may not again be admitted. No student will be allowed to repeat more than one year of the course or to repeat a class more than once.

**Discipline** The educational system of the University stresses the development of Christian character and gentlemanly behavior at all times and in all places.

The school reserves the right to terminate its connection with any student who does not give sufficient promise of attaining that degree of scholarship and technique required in a Doctor of Dental Surgery, or who lacks those qualities which enter into the fine character required in a worthy member of the dental profession, or whose conduct in or out of the School is objectionable. The final decision in this matter rests with the Executive Committee of the Faculty and/or the Board of Directors. The fees of such a student will not be returned.

The School is not responsible for the loss of any personal property belonging to any of its students, whether the loss occurs by theft, fire, or an unknown cause.

**Requirements For Graduation** On recommendation of the Faculty, the degree of Doctor of Dental Surgery (D.D.S.) will be conferred on those candidates who have complied with the following requirements: (1) The candidate must have given evidence of good moral character and ethical ideals; (2) he must have completed with due quality all courses and examinations prescribed; (3) he must have paid all indebtedness to the School; and (4) he must be at least twenty-one years of age.

**Graduation Honors** Graduation honors are computed according to the quality point system. A student's graduation average is determined by dividing the total number of quality points earned by the total number of semester hours attempted by the student during his entire course. A student who has made an average of 3.5 graduates *cum laude;* one who has made an average of 3.7 *magna cum laude;* one who has made an average of 3.9 *summa cum laude.* Record of these honors is inscribed on the diplomas and noted in the list of graduates published for the Commencement Exercises.

# DESCRIPTION OF COURSES

## OPERATIVE DENTISTRY

Dr. Eastman Dr. O'Shell Dr. Jobe Dr. Hayden

**Course I** A lecture and laboratory course in the fundamental principles and technic of this subject. It is given in sophomore year.

**Course II** A lecture course throughout junior year dealing with the clinical phases of the subject.

**Course III** Discussions and demonstrations of operative problems and variations in technics.

## DENTAL ANATOMY

Dr. Copping Dr. Carimi

A lecture and laboratory course covering in detail the structure, development, characteristics, arrangement, and function of all teeth in the oral cavity, with systematic nomenclature. A careful study is made of the surfaces, ridges, fossae, pulp chambers and pulp canals of the teeth, proper contact of approximate teeth, normal occlusion and the relation of the teeth to their supporting tissues.

## PROSTHODONTICS

Dr. Hall Dr. Tegtmeier Dr. Weyer Dr. Somers
Dr. Linn Dr. Sartin

**Complete Denture Prosthesis** **Course I** A lecture and laboratory course in the principles and technic of complete denture construction. It is given in the freshman year.

**Course II** A lecture and laboratory course in Removable Partial Denture Construction. The various types of Removable Partial Dentures are explained, designed and constructed by the sophomore student. This course prepares the sophomore to adequately fabricate the technical aspect of clinical Removable Partial Denture treatment during his junior and senior clinical years.

**Course III** Lectures in this course in junior year cover the physiological, anatomical, and operative phases which influ-

ence complete practical denture construction of every type. Original cases are also cited and the special technics involved are explained in detail. Instructions on esthetics are given to students for a better understanding of the construction of complete dentures that will harmonize with the facial cosmetics of the individual case.

**Course IV** Lectures in senior year continue the Complete Denture theory through the first semester. The second semester concerns Removable Partial Denture theory and clinical applications.

**Crown and Bridge Prosthesis**

**Course I** A lecture and laboratory course in the fundamental principles and technic of crown and bridge prosthesis. It is given in sophomore year.

**Course II** A lecture and laboratory course given throughout the junior year covering all phases in the clinical application of crown and bridge technic.

**Course III** This course given in the senior year consists of lectures and demonstrations of problems and the various technics of crown and bridge.

## DENTAL MATERIALS

Dr. Linn

A course in the chemical and physical properties of the materials used in dentistry and in the fundamental processes of their use.

## CLINICAL DENTISTRY

Dr. Houghton Dr. Eastman Dr. Hall Dr. Towill
Dr. Parker Dr. Boudreaux Dr. Kitchin Dr. Tegtmeier
Dr. Weyer Dr. Donaldson Dr. Wilderman Dr. O'Shell
Dr. Copeland Dr. Jobe Dr. Somers Dr. Hayden Dr. Linn
Dr. Walle Dr. Farchione Dr. Heller Dr. Britsch Dr. Brue

The principles of operative dentistry and prosthodontics are applied by the students in their junior and senior years in the dental clinic under the direct supervision of the instruc-

tors. Each student has opportunity to utilize his knowledge and skill acquired in operative and prosthodontic technics in making actual restorations for the patients.

Special clinic practice in periodontics, endodontics, and orthodontics is given under the direction of the instructors in clinics conducted each day.

Special opportunities in oral surgery are offered in the surgery clinic of the University, and the outpatient clinic of the Charity Hospital, where students perform the dental surgical operations under the direct supervision of the instructors.

**Summer Clinics** Clinic and hospital service continue throughout the year except for the month of August, thereby affording members of the junior and senior classes an opportunity to secure additional clinical experience in all departments.

## ORTHODONTICS

Dr. Walle Dr. Heller

**Course I** In sophomore year the preclinical course is given dealing in class and laboratory with occlusion and malocclusion, the taking of impressions and making of casts, pouring and correct trimming of models, constructing molar and incisor bands with various forms of soldered attachments, constructing a lingual arch with auxiliary springs, and a labial appliance with bracket bands, in addition to various freehand soldering operations.

**Course II** This course is given in junior year and consists chiefly in a study of the conditions and factors to be examined in the patient, the indications and contraindications for orthodontic treatment, the planning and handling of the treatment. The principles thus taught are applied in clinic practice, each student under close supervision carrying out the treatment of at least two cases.

**Course III** The studies of the previous course are carried forward in senior year to include such topics as the relation of tissue and organs under treatment, preventive orthodontic service and the like. The importance of realizing one's limitations in the matter of difficult cases is emphasized. Cases under treatment in the clinic are discussed.

## PATHOLOGY

Dr. Halperin Dr. Matukas Dr. Monteleone

**General and Oral Pathology** This course in the sophomore year is designed to meet the needs of students of dentistry in the broad field of pathology. The physiologic aspect of disease is emphasized and this is correlated with resultant histopathologic changes. In the first semester attention is devoted to basic pathologic processes such as predisposition to disease, etiology and pathogenesis of disease, circulatory disturbances, retrogressive tissue changes, inflammation and neoplasia. The principles learned in the early part of the course are then applied to the various systems and organs of the body. In the second semester, the major attention is given to diseases of the oral cavity and its associated structures. A special effort is made to correlate the basic principles of pathology with diseases of the oral regions and apply this knowledge to the practice of dentistry.

**Clinical Oral Pathology** This course in the senior year is concerned with diseases of the teeth, jaws, and soft tissues of the oral cavity primarily from the clinical aspect. The case history approach is emphasized. Students have an opportunity to enter into discussion of the various lesions from the standpoint of clinical manifestations and a rational approach to diagnosis and treatment. Technique of treatment is not considered.

## ORAL MEDICINE

Dr. Wilderman Dr. Copeland Dr. Farchione

The etiology, underlying histopathology, and treatment of periodontal diseases are considered and correlated with the special clinical instruction in periodontics and endodontics.

## ROENTGENOLOGY

Dr. Donaldson

In the sophomore year the electro-dynamics of radiology and the technical procedures in dental radiology are presented by lectures, demonstrations and laboratory experience. In the junior year interpretation and correlation of radiographic findings are emphasized.

## ORAL DIAGNOSIS

Dr. Kitchin

In the junior and senior years the student gains clinical diagnostic experience in making dental and oral examinations and correlating the clinical findings with the X-ray interpretations. In the treatment planning special consideration is given to the oral manifestations of functional and organic disease.

## SURGERY

Dr. Houghton Dr. Parker Dr. Boudreaux

**Oral Surgery** The object of this course is to give the student a practical knowledge of the application of the principles of surgery and surgical technique, and a familiarity with hospital and clinic procedures, in order that he may be better fitted to cooperate with the surgeon in consultation and more fully comprehend the complications which may arise.

Lectures are given in the senior year covering the surgical diseases of the jaws and soft tissues of the mouth with some explanation of the operative procedures. The senior students are regularly assigned to two weeks externship at Charity Hospital during the year and regularly observe operations performed by their teachers in the operating rooms of the hospital when the opportunity presents, as well as observation of the oral surgical cases in the hospital wards.

**Exodontia** The theory and application of the basic principles of surgery to exodontia and minor oral surgery are covered. The armamentarium and its use in the various techniques of exodontia are presented. The importance of adequate clinical and radiographic examination is stressed. The principles of tooth division techniques are correlated with all types of impacted teeth and other related problems of exodontia. All minor surgical techniques required in the preparation of the mouth for removable prostheses are emphasized. Preoperative considerations, postoperative complications and the implications of oral surgical intervention to adjacent and regional structures are discussed.

**Local Anesthesia** The anatomy of the trigeminal nerve is reviewed and correlated with the techniques of regional anesthesia. The properties, mode of action, pharmacology, advantages and contraindications of local anesthetic agents are stressed. Local anesthetic complications and emergencies are covered.

## GENERAL ANESTHESIA

Dr. Adriani and Staff

A lecture and demonstration course in the principles and technics of general anesthesia, emphasizing the use of nitrous-oxide-oxygen and other anesthetics in dental operations.

## PEDODONTICS

Dr. Towill

This course consists of lectures, clinics and technic laboratory instruction which covers the technical aspects of treatment of children's teeth. Instruction is offered in the fundamentals and modification required in the preparation of all classes of cavities in the temporary teeth for the proper reception of different filling materials, emphasizing conservation of tooth structure. The proper manipulation and insertion of various metallic and plastic filling materials are carefully taught. The proper care of the first permanent molars is particularly emphasized. Various methods and procedures indicated in the restoration of broken and fractured central incisors in children are demonstrated. For the purpose of rational tooth conservation the technic of partial pulpotomy is taught, together with its indications and contraindictions. The problem of the premature loss of deciduous teeth which necessitates proper space maintenance is carefully considered. Methods of constructing various types of space retainers in the treatment of such spaces are demonstrated. Prophylaxis and the use of sodium fluoride is emphasized as a factor in prevention. Emphasis is placed upon diagnosis and specific treatment planning.

A children's clinic, separate from the general operative clinics, equipped and supervised by a special pedodontic staff offers an opportunity for clinical demonstration of the practices stressed in the lecture course. The clinic for children's dentistry is conducted as a separate and independent department, however it works in close harmony with all other departments and especially the departments of Operative Dentistry, Orthodontics and Public Health. Seminars are given at regular intervals throughout the third and fourth years.

## PUBLIC HEALTH DENTISTRY

Dr. Cook

This course is designed to provide the dental student with some insight into the philosophy, administrative organization and functions of public health. The elements of epidemiology, public health bacteriology and administrative practice are presented. Examples are used to orient the student in the application of these disciplines in the control of dental diseases.

## ANATOMY

Dr. Thompson

**Gross Anatomy** This course consists of dissection supplemented by quizzes, conferences and lectures. The aim of this course is to give the student an opportunity to gain a comprehensive knowledge of the structure of the entire body, with special emphasis on the anatomy of the head and neck region. The student is required to make a satisfactory dissection of one lateral half of the body.

## MICROSCOPIC ANATOMY

Dr. Halperin Dr. Wilderman

**General Histology** This course embraces the combined study of general embryology, histology, histogenesis and organogenesis. Lectures, recitations, laboratory exercises and special demonstrations illustrating histogenesis, organogenesis, as well as the study of normal adult tissues, will be included.

**Oral Histology** The tissues of the teeth and oral cavity are studied with greater minuteness, charts and models are made use of, and special slides are prepared for microscopical study and projection.

## BACTERIOLOGY

Mr. Duggan

A comprehensive course in general microbiology to acquaint the student with the characteristics of bacteria, viruses and fungi associated with infectious diseases. The laboratory work is designed to provide the student with techniques commonly used and correlated with the lecture material so that experiments can be designed, analyses made and results interpreted to meet the requirements of the practicing dentist.

The course is designed to give to the student a working knowledge of the subject and to impress upon him the relation of mouth conditions to systemic disease.

## PHYSIOLOGY

Mr. Duggan

A lecture and laboratory course, given in sophomore year. The lectures cover the whole field of general physiology, the functions, composition, and operations of the body structures. In the laboratory small mammals are used to demonstrate the physiological processes of respiration, circulation, and digestion.

## PHARMACOLOGY

Dr. Ireland Mr. Duggan

**Course I** A lecture and laboratory course in sophomore year dealing with the action of drugs on the animal system. Care is taken to teach and exemplify the action of those drugs which are chiefly used in the practice of dentistry.

**Course II** A lecture course, given in junior year, on the classification, description, and properties of drugs and medicines with which a dentist may have to deal. Special stress is laid upon the more important drugs used in dentistry, with a full discussion of their physiological effects and a study of the proper methods of administration. Prescription writing is explained in detail.

## BIOCHEMISTRY

Dr. DiMaggio

A lecture and laboratory course, in freshman year, dealing with the chemical activity of the human body; the significance of osmotic pressure, colloids, hydrogen-ion concentration, buffer action, and oxidation-reduction in physiological processes; the chemistry of fats, carbohydrates, and proteins and their fate in the human body; enzymatic reactions; the blood and other body fluids; hormones; nutrition; animal calorimetry; the vitamins; bone and teeth.

## PRINCIPLES OF MEDICINE

Dr. Robinson

In this course, taught throughout senior year, the objective is to enable the student to acquire a general knowledge of the various diseases of the heart, lungs, and abdominal organs. The essential principles of medicine are dwelt upon, with special attention to diseases which may result from mouth infections. The general principles of physical diagnosis are studied and demonstrated in the classroom and hospital, and eight lectures are devoted to first aid.

## DENTAL HISTORY AND ETHICS

Dr. Tiblier

This course, for seniors, treats of the intrinsic difference between moral good and moral evil; the rights of the dentist; his duties to himself; his relationship to his patient; his responsibilities to society and his obligations to his profession. Lectures cover the development of Dentistry and its advancement to its present health importance and professional standing.

## JURISPRUDENCE

Mr. Duplantier Mr. Varela

These lectures, for seniors, cover the laws and regulations pertaining to the practice of dentistry, with all the legal relationships of dentist and patient, their rights and liabilities.

# DEGREES CONFERRED

May 31, 1961

John Tony Anzalone
Didier Ardoin, II
Loyd Richard Ball, Jr.

# CURRICULUM OF DENTAL HYGIENE SCHOOL OF DENTISTRY

LOYOLA UNIVERSITY
6363 St. Charles Avenue
New Orleans 18, Louisiana

*Director,* FRANK J. HOUGHTON, D.D.S., F.A.C.D., F.I.C.D.
*Supervisor,* C. EDNA PEREZ, R.D.H., B.S.

The dental hygiene program initiated at Loyola University School of Dentistry in September 1960 is the first of its kind ever to be established in Louisiana. The dental hygiene program was made possible through a grant from the W. K. Kellogg Foundation, Battle Creek, Michigan, for this specific purpose. The Curriculum of Dental Hygiene of the School of Dentistry is in keeping with the modern trend toward preventive dentistry in which the dental hygienist, as an ancillary member of the dental team, plays a vital role. After thorough examination, the Curriculum of Dental Hygiene has been accredited by the Council on Dental Education of the American Dental Association.

The dental hygiene movement began in the 1880's when it was realized that auxiliary personnel were needed in the dental practice to perform preventive measures and to educate the patient in oral hygiene. In 1913 Dr. Alfred C. Fones, of Bridgeport, Connecticut, established the first training course for dental hygienists. Because of the increased interest in this new profession and the passage of licensure laws governing the practice of dental hygiene in both New York and Massachusetts, three additional schools were conducting training programs in these states by 1916. Today there are 37 Dental Hygiene Schools, all of which conduct a two-year academic program leading to a Certificate in Dental Hygiene; some offer a four-year degree program.

The dental hygienist has several avenues of approach to her profession. In a private dental office her principal duties are performing oral prophylaxes, taking and processing x-rays, applying fluoride to the teeth of children, making diet analyses, and instructing patients in the proper care of the

mouth. The dental hygienist may be employed by State and Federal Public Health Departments where she would take part in dental surveys and educational programs in addition to her specific duties. Some industries employ dental hygienists to care for the dental health of their employees and to give instruction in dental health care. In public school systems the dental hygienist may be employed as a classroom teacher, making demonstrations of toothbrushing methods, doing mouth inspections, administering fluoride, and prophylactic treatments. Hygienists qualify and are hired as clinical instructors and administrators in universities offering Dental Hygiene Programs. Institutions such as county, city, state and federal hospitals employ dental hygienists. As a civil service employee the hygienist may be employed in an army post, veteran's hospital or base hospital. She may also obtain employment as a research worker collecting data for surveys and research projects. The dental hygienist may be employed in any state, district, or territory in which she holds a license. All 50 states, the District of Columbia, and Puerto Rico license the Dental Hygienist.

**Requirements for Admission**

Application with photograph and application fee.

Medical and dental health reports.

College Entrance Examination Board test score.

Dental Hygiene Aptitude test score.

High school or college transcript.

Three letters of recommendation.

Personal interview.

Women 18 years of age or over, of good moral character, who have graduated from an accredited high school are considered. Application forms are furnished upon request to the Director of Dental Hygiene, School of Dentistry. Application to the Curriculum of Dental Hygiene must be completed by April 15 in order for a candidate to be considered for the class beginning in September. Candidates must make an appointment for personal interview after filing all other requirements.

Candidates must furnish medical and dental health reports. They must pass the Scholastic Aptitude Tests of the College

Entrance Examination Board and the Dental Hygiene Aptitude Test of the American Dental Hygienists' Association. It is the responsibility of each candidate to contact the American Dental Hygienists' Association, 304 East 45th Street, New York 17, New York, and the College Entrance Examination Board, Box 592, Princeton, New Jersey, to make application for each test. It is necessary to inform both the College Entrance Examination Board and the American Dental Hygienists' Association to send the test scores to the Director, Curriculum of Dental Hygiene, School of Dentistry, Loyola University.

High school or college transcript must be filed with the Director of the Curriculum of Dental Hygiene, School of Dentistry, Loyola University. At least fifteen acceptable high school units are required, of which twelve must be in strictly academic courses. High school biology, chemistry and physics are not required but are strongly recommended.

1. All students must present the following units:

| | Units |
|---|---|
| *English | 4 |
| History, Civics | 2 |
| Elementary (College Preparatory) Mathematics | 1 |
| Intermediate (College Preparatory) Mathematics | 1 |
| **Latin or Modern Foreign Language | 2 |
| Science | 1 |
| Academic Elective | 1 |

2. In general, only three units will be accepted from the following group:

| | Units | | Units |
|---|---|---|---|
| Bookkeeping | 1 | Economics | ½ - 1 |
| Commercial Law | ½ - 1 | Music | 1 |
| Commercial Geography | 1 | Shop Work | 1 |
| Drawing—Mechanical | 1 | Stenography | ½ |
| Drawing—Freehand | 1 | Typewriting | ½ |

*One unit in English may be replaced by a unit in Speech or Journalism.
**These units may be waived and supplied by scheduling elementary language courses in College.

Because each class is limited to 25 students, every effort is made to select those applicants who are considered best qualified for education in dental hygiene and for successful practice. While academic ability is considered in selecting students, personality characteristics are also studied. Some important characteristics of the dental hygienist are achievement, persistence, orderliness and dependability.

**Tuition and Expenses**

| | | |
|---|---|---|
| Tuition and fees (per year) | | $750 |
| Instruments (entire course) | approximately | $200 |
| Books (entire course) | approximately | $200 |
| Uniforms, laboratory coats, incidental expenses, etc. (entire course) | approximately | $100 |

Uniforms, laboratory coats, instruments and supplies are not to be purchased until instructed.

The dental hygiene students are entitled to participate in the University's activities and organizations and receive subscriptions to the Loyola Maroon and Wolf. Lockers are provided to the dental hygiene students for the safekeeping of their instruments, books, supplies, and clothes. The Dental Hygiene Students' Lounge furnishes a place to relax, study, dress and fraternize with classmates.

**Housing for Women Residents**

Since dental hygiene students are accepted from surrounding states as well as Louisiana, they are expected to live in Approved Housing. The University maintains several residences adjoining the campus. Single, double, and triple rooms are available for coeds. Meals may be taken at the University cafeteria or nearby restaurants. Students living in Approved Housing are subject to the same supervision as is expected in any dormitory. For additional information on housing please contact:

Dean of Women
Loyola University
New Orleans 18, Louisiana

## SUMMARY OF CURRICULUM OF DENTAL HYGIENE

| | | | First Semester | | Second Semester | | |
|---|---|---|---|---|---|---|---|

| | Dh 124 | Special Lectures & State Laws | | | 48 | | 3 |
| | Dh 117 | First Aid & Hospital Procedures | | | 16 | | 1 |
| | | | | | | | 33 |
| | | | | | | | *71 |

*Upon satisfactory completion of 71 Credit Hours, a Certificate of Dental Hygiene is conferred.

## CURRICULUM

**Bl 122A—Microbiology**

This course embraces bacteriological technics, the classification and properties of important non-pathogenic and pathogenic bacteria, molds, and viruses. The principles of immunity and serology are briefly treated. This course is designed for nurses. Two lectures and two laboratory periods.

4 hours

**Bl 205-6—Anatomy and Physiology**

A lecture demonstration course designed to give the student of Dental Hygiene thorough and practical knowledge of these basic sciences with concentration on the head and neck.

Dr. Beard 6 hours

**Ch 101—General Chemistry**

Fundamental principles of chemistry; the laws of chemical action and description of the non-metallic and metallic elements and their compounds. Prerequisites: High School algebra and geometry. 4 hours

**En 101-2—Freshman Composition**

Rapid grammar review and introduction to accurate and comprehensive reading; introduction to research; the research paper. Continuation of comprehensive reading; introduction to literary readings and forms; language as communication on all levels.

Dr. Horne 6 hours

**Th 105, 106, 210 and 311—Theology**

A thorough study of the four gospels and life of Christ; The Magisterium of the Church: Founding of Church, Teaching Authority of Church; Mysteries of Faith, Trinity, Original Sin, Incarnation and Redemption; Catholic Marriage: Dogmatic, moral, and canonical explanation of the Sacrament of Matrimony. 8 hours

**Dh 110—Radiodontics and Oral Diagnosis**

Study of the processes involved in exposing, processing, and mounting of dental x-ray films. Includes explanation of landmarks that show in x-ray films. Technics in examination of the teeth and tissue of the mouth through close observation

and with the aid of radiographs (x-rays) and diagnostic models are stressed.
Dr. Donaldson 2 hours

**Dh 112—Dental Materials**

This course introduces the materials used in restorative dentistry, prosthetic dentistry and orthodontics, their manipulation and application in dentistry. 3 hours

**Dh 114—Public Health**

Theories of preventive dentistry, medicine and public health with emphasis on methods promoting better dental health and school and community dental health services. Study of various diseases, their etiology, prevention and cure through Public Health measures.
Dr. Cook 1 hour

**Dh 115—Histology, Embryology and Periodontology**

Histologic methods and microscopic study of tissues and organs of the mammalian body and the study of the fundamentals of hematology. Study of diseases of the gingival and periodontal tissues, their prevention and cure.
Dr. Wilderman 3 hours

**Dh 117—First Aid and Hospital Procedures**

Orientation in the standard practices of first aid, treatment of hospital ward cases, and hospital methods of sterilization.
Dr. Parker 1 hour

**Dh 101—Dental Anatomy**

The study of the structural formation of the permanent and deciduous (primary) teeth, accompanied by a laboratory course for carving the teeth out of wax.
Drs. Copping & Carimi 5 hours

**Dh 103—Dental Hygiene**

The history of the dental hygiene profession, professional ethics, generalized mouth conditions and patient education in dental hygiene. Includes the study of factors which contribute to a healthy condition of the mouth. Study of measures employed to arrest dental caries and tissue degeneration. Study of toothbrushing and other oral hygiene methods.
Miss Perez 2 hours

**Dh 105—Dental Orientation**

Orientation into the various special fields of dentistry; a series of introductory lectures by professors in each department of the School of Dentistry.

Dental School Faculty 1 hour

**Dh 107—Dental Health Education**

Methods and materials used in teaching dental health in private practice, public schools, industries and institutions. Lesson plans and presentations are made by the student.

Miss Perez 2 hours

**Dh 108—Health Education**

A general background of the school health program includes health services, healthful school conditions, and emphasizes materials and methods for teaching health in the schools and the communities.

Dr. Kitchin 1 hour

**Dh 118—Nutrition and Dietetics**

The principles of nutrition in relation to good health with special emphasis on dental implications. The food needs of normal individuals of different ages and the selection of food for the maintenance of maximum health are stressed. 1 hour

**Dh 119—General and Oral Pathology**

Generalized study of pathologic conditions, etiologies of diseases, inflammation, infection, immunity and degenerative processes.

Dr. Halperin 3 hours

**Dh 120—Dental Hygiene Laboratory**

Devoted to instructing students in the use of instruments to remove deposits and stains from teeth of manikins in preparation for clinic practice.

Miss Perez and Staff 2 hours

**Dh 121—Materia Medica and Therapeutics**

Lectures on the sources of drugs, methods of administration, classification, dosage and therapeutic application. Orientation in pharmacology as it affects the clinical practice of dental hygiene and dentistry. Includes the study of the value of germicidal agencies and antibiotics.
Dr. Ireland 2 hours

**Dh 122—Practice Management**

Orientation in cost accounting and bookkeeping in the dental office, methods of payment of dental fees, management of finances, dental office policies and procedures, application of ethics in everyday practice, and legal responsibilities of the dentist and hygienist.
Dr. Caire 1 hour

**Dh 124—Special Lectures and State Laws**

Ethics, economics, jurisprudence are stressed along with a brief review of all courses in preparation for State Board Examinations. State Dental Laws governing the practice of dental hygiene are emphasized.
Dental School Faculty 3 hours

**Dh 130, 135—Clinical Dental Hygiene**

The actual practice of the dental prophylaxis, exposing and processing x-rays, fluoride applications, dental health education, charting the mouth, and various other duties of the dental hygienist. Clinic training is under direct and close supervision, to give individual instruction when necessary. Clinic practice is obtained both in the dental clinic of the School of Dentistry and in the Loyola University Dental Clinic in Charity Hospital. Clinic practice each afternoon during the second year of training.
Miss Perez and Staff 10 hours

## CURRICULUM OF DENTAL HYGIENE

## LIST OF STUDENTS, 1961-1962

### First Year

### Class of 1963

| | |
|---|---|
| Cawthorn, Harbeth C. | Florida |
| Cox, Bonnie A. | Florida |
| Cuellar, Cheryl J. | Florida |
| Davis, Jane M. | Louisiana |
| Earley, Patricia C. | Florida |
| Ellis, Marjorie A. | Florida |
| Ernst, Lynda M. | Louisiana |
| Fulcher, Gayle L. | Louisiana |
| Galvin, Delia S. | Louisiana |
| *Grundmann, Marguerite I. | Louisiana |
| Hemerick, Judith M. | Florida |
| *Johnson, Anne E. | Georgia |
| MacDonald, Barbara A. | Florida |
| MacKersie, Sharon V. | Louisiana |
| Moreland, Carol A. | Florida |
| Oser, Lirly A. | Louisiana |
| Prudhomme, Amy L. | Kansas |
| Rambeau, Trudy A. | Louisiana |
| Raub, Carolyn P. | Mississippi |
| Ryan, Kathleen L. | Louisiana |
| Sarniguet, Linda A. | Louisiana |
| Smith, Andrea B. | Louisiana |
| *Sykora, Jacqueline G. | Florida |
| Vidrine, Eleanor R. | Louisiana |
| Watkins, Jackquline M. | Florida |

### Second Year

### Class of 1962

| | |
|---|---|
| Basile, Charlotte A. | Louisiana |
| Blanchard, Patricia A. | Louisiana |
| Bond, Barbara A. | Louisiana |
| Burns, Linda M. | Louisiana |
| Cosse, Christina | Louisiana |

*Did not finish the year.

| | |
|---|---|
| DeFraites, Blanche M. | Louisiana |
| Durel, Judy R. | Louisiana |
| Frankel, Carol M. | Louisiana |
| Hitzman, Judy F. | Louisiana |
| Holten, Judith N. | Louisiana |
| *Kearney, Jean H. | Florida |
| Kern, Kathleen H. | Louisiana |
| Korones, Roberta S. | Louisiana |
| *LeBlanc, Linda R. | Louisiana |
| Linden, Hazel A. | Louisiana |
| Maguire, Barbara L. | Texas |
| Metzler, Marianne T. | Louisiana |
| Ponton, Janet A. | Florida |
| Scarengos, Carol A. | Louisiana |
| Smith, Lynn D. | Louisiana |
| Smith, Sandra J. | Louisiana |
| Snyder, Jacquelyn R. | Louisiana |
| Vives, Virginia A. | Louisiana |
| Webb, Patricia J. | Georgia |
| Webre, Gail A. | Louisiana |

*Did not finish the year.
